

HFS Grafting and Tree Sales Days and Tree/Scion Sales for 2023

Each winter, HFS offers a range of opportunities to acquire either young fruit trees or scion (budwood) you can graft yourself:

- **Our annual HFS Grafting and Tree Sale Days:** free events we run where you can discuss your fruit-tree growing needs with us, buy trees and/or scion, and observe on-the-spot tree grafting
- **Our mail-order service:** order trees or scion on-line for delivery by post

More details about these options are given below.

About what we sell

The current list of apple varieties we have at Pettys appears at the bottom of this page. We typically offer scion from about a quarter of the listed varieties, selected based on popularity from prior years' sales and feedback from our Apple Tasting events. Due to variations in the maturity of source trees and their growth, we cannot guarantee that scion for a particular

variety will be available. If a specific variety is a 'must-have' for you, please email us the details, and we will let you know whether we can provide viable scion.

We normally graft our apple trees onto MM102 rootstock, as this is our regular rootstock for suburban trees. However, we also sell a limited number of one-year-old trees with popular heritage varieties grafted onto M26 and MM102 rootstock. A list of these will appear here soon – but early birds do catch worms, so if there's a particular variety you're after, ordering early is recommended.

Our prices are as follows:

Scion (each will have at least three buds)	\$3.00 per scion; \$2.00 each for three or more scion of one apple variety
Trees grafted on-the-spot on our Grafting and Tree Sales Days	\$15.00
One-year-old pre-grafted trees (<i>list of these will be included here soon</i>)	\$25.00

Please note that discounts on the prices given above are given to financial HFS members – see our Members page for details. You may find our prices surprisingly low ... and for good reason: HFS's main purpose is to ensure that special old fruit varieties will survive us all, and every tree we provide helps that to happen.

And ... if you have specific or unusual requirements beyond what is described here – for example, if you need a tree to be grafted onto a specific type of rootstock – please send us your request by email to heritagefruitssociety@gmail.com . We will do our best to help!

About our annual HFS Grafting and Tree Sales Days

Each winter, the Society runs several free public Grafting and Tree Sales Days. In most years, one of these is held at the HFS Heritage Block at Petty's Orchard, and another at [CERES](#) in Brunswick. These are our biggest public-facing events of the year, where visitors can:

- obtain scion (budwood) from many of our hundreds of varieties of apples and other fruits
- request on-site grafting of apple scion onto suitable rootstock we provide (please note: we do not sell ungrafted rootstock separately)
- purchase pre-grafted or pre-ordered young trees, ready for planting out
- observe experienced and friendly HFS volunteers as they graft up new trees
- ask our knowledgeable volunteers about all aspects of the above
- join a guided walking tour of the HFS Heritage Block (at the Petty's Orchard Grafting Day only)

At each of these events, scion and freshly-grafted trees are also sold at extremely reasonable prices. This is in line with our group's objective of making it easy for anyone to help in the preservation of unusual fruit varieties, as well as instilling an interest in this precious and remarkable field. The scion and tree varieties provided are primarily ones popular with attendees of prior Tastings and Grafting Days, and are ones which are typically difficult or impossible to obtain from any other source.

About our mail-order service

We accept orders by email for apple scion and/or pre-grafted apple and plum trees each winter until 15 August. Once again this year, we are making a broad range of trees and scion available. We can also graft apple trees with your chosen scion onto MM102 rootstock for collection or postage in September or October, once we are confident that our graft has taken successfully.

There's no special on-line form to fill out to make an order: all we need is a written description of what you'd like in an email to us at heritagefruitssociety@gmail.com. By prior arrangement, ordered scion or trees may be collected at one of our Grafting Days (see above), or they can be sent to you by post. We are happy to post articles to addresses in Victoria – or to other states, as allowed by biosecurity regulations.

For posted orders, an extra postage/handling fee will be required on top of our standard prices shown above. All payment details will be sent to you by email in response to your inquiry or order.

Apple Varieties in the HFS Collection

The full list of apple varieties in the HFS collection as at May 2023 is shown below.
Warning: varieties marked with '?' are likely to be incorrectly identified. As mentioned above, we aren't able to obtain viable scion material from all of these in any given year.
