City Council

Road Reconstruction and Drainage Program

2026 to 2041

Introduction

The follow tables show Council's 2026 to 2041 road reconstruction and drainage program for each DCP Charge Area. Council will use these tables to deliver DCP works up to the total value given in the DCP's incorporated document for the Charge Areas. Council's final selection of priority locations will be informed by ground conditions.

All works listed in this program are capital works linked with Council's 4-year budget and capital works program. None of these projects are maintenance works.
