
Mild Steel Step Iron A140.11

DESIGN STATEMENT

Mild steel step iron is used for access down deep stormwater pits (more than 1 metre deep).

APPLICABLE LOCATION

Mild steel step iron is installed in stormwater pits deeper 1 metre deep for access.

COUNCIL STANDARD DRAWING

SD 190 Mild steel step iron.

CROSS REFERENCE DOCUMENT

- Merri-bek Standard Specification Section 60.

STANDARD SPECIFICATION

Refer to Notes 1-4 as detailed on the drawing in general notes for the standard specifications.

SUPPLIER

N/A

MAINTENANCE

Road Maintenance Unit: Replace steps when they show signs of weakness by rust.

GENERAL NOTES

1. Step irons to be provided in all pits deeper than 1 meter.
2. The irons to be spaced at 300mm centres, commencing 300mm from the top of pit and the last iron shall be no more than 300mm above invert of pit.
3. The step irons to be staggered for the width of the step irons.
4. Step irons to be mild steel bars treated with heavy duty hot dipped galvanising.
