
Typical Furniture Layout for Parks B110.02

DESIGN STATEMENT

Placement of furniture in open space areas requires minimum acceptable distances between furniture and fixtures to allow for a comfortable degree of circulation space and encourage their usage for separate groups of users with differing abilities. Providing sufficient offsets between furniture also allows maintenance crews enough access to undertake ongoing maintenance tasks without difficulty.

APPLICABLE LOCATIONS

Merri-bek open space including conservation areas, parks, playspaces and reserves.

COUNCIL STANDARD DRAWING

B110.02 Park Typical Furniture Offsets.
