

Urban Fence B150.08

DESIGN STATEMENT

The Urban Fence is higher-quality fencing solution for activity centre areas. The powder-coated black steel fencing is modern and visually noticeable to motorists, cyclists and pedestrians. The design avoids horizontal components that can become a spearing hazard for traffic. The fence is transparent from different angles, using M16 rods for vertical elements.

The fencing may help to improve safety around intersections, school gates, or for level change safety barriers. The use of fence should be considered according to the context to avoid visual clutter.

APPLICABLE LOCATIONS

Merri-bek activity centres of Brunswick, Coburg, Glenroy and Small Shopping Strips as specified by Council.
