
Outdoor Power Point B200.04

DESIGN STATEMENT

Outdoor power points provide additional facility to the public space for community usage. It can add activation to the space by allowing mobile phone charging, busking, and providing connection for outdoor events equipment such as speakers and coffee carts.

The design of the power point is high quality and discreet. The power point is suitable for exposed areas (high resistance to IK10 impacts) and is weatherproof (IP55 guaranteed weatherproof).

Consider placing two single power points in an area. Use of 15Amps instead of 10Amps will allow versatility for larger equipments such as coffee carts.

APPLICABLE LOCATION

Activity centre areas and parks as specified by Council.
