

Martin Reserve: fitness equipment

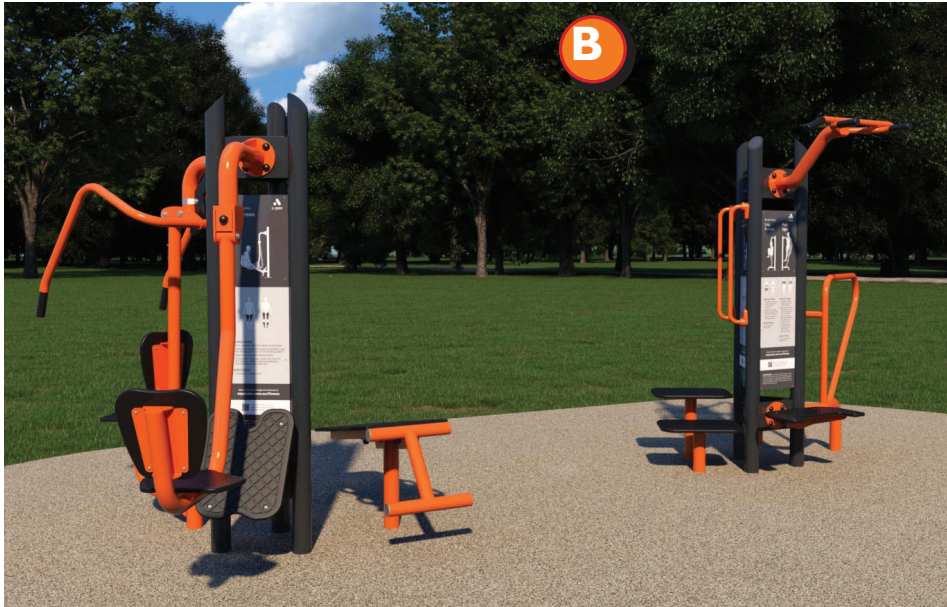

Following a successful grant application, Council will be providing two separate fitness equipment stations in Martin Reserve, Hadfield, with funding allocated in 2020-2021. These works include:

- One station offering a variety of aerobic, cardio and flexibility elements (north west corner by Epping Street)
- A second station near the netball courts providing a range of strength building exercises.

A concrete circular path with ground markers and access paths from reserve entries will be provided after the fitness equipment has been installed.
