Frequently Asked Questions

MoreSpace vacant shop program

The MoreSpace vacant shop program transforms lonely vacant shops into colourful shoppable window displays featuring local products passers-by can purchase using interactive QR codes. Highlight your vacant shop with a MoreSpace installation to increase visibility and attract new tenants, fast.

This initiative is free for all participants, and is proudly brought to you by Moreland City Council.

How much does the program cost? What will I have to pay?

Participation in this program is free for Landlords, Real Estate Agents and participating businesses. All costs related to the program are covered by Council.

Will we be able to advertise the vacant shop as *For Lease*?

Of course! We will create and install a custom 'For Lease' signage panel for your vacant shop's window, which will feature the property's details, your contact details, and a QR code. This QR code will take prospective tenant's straight to your website's property listing so they can view more information about the property.

Will I need to provide Council with access to the vacant shop?

Aside from the day we install the display, we will not require any access to the vacant shop. This installation is designed to be autonomous. The window displays and QR codes make the shopping experience easy for customers and prospective tenants to view and shop the space. There is no need for staff to be in attendance.

Can I still show possible tenants through the vacant shop?

Of course! MoreSpace will only take up room against the front shop windows, so potential tenants can still view the space safely and easily. We won't impede on any walkways and you will still have full access to the property.

What if I find a suitable tenant? How long will it take to remove the window displays?

Once a suitable tenant is found for the property, you will need to give Council notice at least two business days' notice that you require the space. In this time, we will organise to have the display removed entirely, including the removal of all window decals.

What if the new tenant needs to perform works on the vacant shop before they open?

MoreSpace can remain in the window display if a new tenant plans to undertake works before opening to the public. Keeping the MoreSpace installation in place ensures the shopfront remains free of graffiti and well-presented until the new tenant is ready to trade. We will remove the display at a mutually agreed date and time, to ensure hassle free changeover from MoreSpace to the new tenant's window display.
